Front End Developer with 3 years of experience building modular and responsive website designs. Capable of managing projects independently, able to plan and systematically organize my work. Focused on details, keeping up with deadlines, and pre-established budgets. Always eager to improve my skills with hands-on experience and interested in learning new technologies.

Work Experience

📅 FEBRUARY 2021 – CURRENTLY

Front End Developer / Accenture, Rome, Italy

- Led a development team of 4 with the task of improving the accessibility of a website, achieving a score of 93 on Google Lighthouse
- Developed micro front ends in React 17 for a multinational banking application
- Collaborated in a Scrum team of 20, following closely and participated actively in daily meetings with the engineers, designers, and clients
- Self-managed, implemented and deployed a data visualization web app with Angular 13 for a bank internal management tool
- Tested components and services using Karma & Jasmine for an online banking website, resulting in 100% code coverage

📅 OCTOBER 2019 – FEBRUARY 2021

Full-Stack Developer / Jpanik, Rome, Italy

- Developed in a web enterprise platform for hospital management, using the Spring framework for back-end services and Angular for the front-end components.
- Integrated an applet into an interactive graph display platform using the Chart.js library
