Alessandro Roic

Dublin, Ireland | +353892278986 | roic.alessandro@gmail.com | linkedin.com/in/alessandroroic

Senior Software Engineer with 7 years of experience building enterprise web applications. Combines hands-on development with technical leadership to modernize legacy applications, improve performance, and guide architectural decisions across engineering teams.

Professional Experience

IBM - Turbonomic

Senior Software Engineer (Team Lead) | May 2023 - Present | Dublin, IE (previously Toronto, CA)

- Designed and implemented centralized UI access controls, mapping backend permissions to components and routes across 10+ user roles.
- Lead delivery for a five-person engineering team, assigning work, coordinating sprint priorities with product and design, and helping developers resolve technical blockers.
- Led an incremental AngularJS to React migration, defining component integration patterns and migration guidelines while maintaining uninterrupted feature delivery.
- Coordinated delivery across 10 engineers and designed the UI architecture for a policy configuration interface, enabling users to manage nested settings across 20 entity types.
- Migrated the build system from Webpack to Vite, improved code splitting, and removed unused dependencies, reducing initial page load times by 50% and data transferred by 43% for users.

Accenture

Frontend Developer | February 2021 - January 2023 | Rome, Italy

- Independently built and deployed a full-stack internal tool with an Angular interface for browsing client records and Java REST APIs for retrieving client data.
- Led a four-developer team in optimizing a government agency's website, using Lighthouse audits to identify and resolve performance and accessibility issues across key pages.
- Developed reusable React UI components within a micro-frontend architecture, supporting multiple banking products for a major European bank.
- Increased unit and regression test coverage across core modules using Karma and Jasmine, improving release stability.

Jpanik

Full Stack Developer | October 2019 - February 2021 | Rome, Italy

- Delivered 20+ features and enhancements across the full stack of a hospital management application.
- Built interactive pediatric growth charts using Chart.js, enabling healthcare professionals to track children's weight against age-based percentiles.
- Developed REST APIs using Java and Spring Boot to support patient data management.
- Migrated AngularJS components to Angular 8, rewriting complex components to simplify the code and enable integration with a new library.

Skills

- **Frontend:** React, Vue, TypeScript, JavaScript, HTML, CSS, Angular, Sass, Redux, Jest, Karma, Jasmine, NgRx, RxJS.
- **Backend:** Node.js, Java, REST APIs, PostgreSQL, Spring Boot, Hibernate, MongoDB.
- **Tools & Methodologies:** Git, CI/CD, GitHub, Figma, Vite, Webpack, Agile, Scrum.

Education

- **Bachelor of Computer Science** / Sapienza University of Rome (Sept. 2016 - April 2020)
- **AWS Certified Developer – Associate** (05 August 2022)

Projects

- Personal Website: responsive portfolio built with Vue 3 and automated CI/CD via GitHub Actions.
